Deliverable: D13.1 Databases with IPM-networks and with channels and media per stakeholder group

Partner responsible: 1 DLO, in collaboration with partners 2 ABC, 3 BIOGARD, 4 ENE, 5 OPEN, 6 PROPH, 7 VIRIDAXIS 13 FiBL, 14 GAB, 18 IRTA, 19 JKI, 20 NUIM, 23 TUG

Due date according to DoW: 1 March 2014

Date of actual delivery: 15 March 2014

This project has received funding from the European Union's Seventh Framework Programme for research, technological development and demonstration under grant agreement no 612713.

Database of IPM networks and primary stakeholders of BIOCOMES

The database contains information of the available communication media and channels of IPM networks and primary stakeholders. Filling up the database is a continuous activity.

Database of IPM networks

The most relevant networks have been collected and contact persons, events, available newsletters etc. have been added. In case of active Twitter accounts, they have also been added and these accounts are being followed by @BIOCOMES.

Addresses of contact persons will be used to inform them about the BIOCOMES newsletter at the end of year 1.

Database of primary stakeholders

Primary stakeholders in European countries and at a European level have been collected. BIOCOMES partners supported this by providing information about their regional stakeholders. Contact persons (if available) are being collected and added. This also counts for the (active) Twitter accounts. Relevant Twitter accounts are being followed by @BIOCOMES.

Registrations for newsletter via BIOCOMES are being made and will be consulted for interesting information and interaction possibilities.

Addresses of contact persons will be used to inform them about the BIOCOMES newsletter at the end of year 1.

The information of the databases will be used to inform, promote and create awareness about the BIOCOMES results and when possible engage stakeholder groups.

These different objectives have been added to the database information.
